Towards a Design Methodology for More supporting an inclusive design attitude in the built environment.

dra. Elke Ielegems

Starting year: January 2014
Supervisors: prof. dr. Jan Vanrie
dr. Jasmien Herssens

Hasselt University: Faculty of Architecture & arts
Research group: Arck

Problem Statement PhD

A. Design Process for More:
1. Guiding principles
2. Analysis of structure/stakeholders
3. Analysing interaction

B. Design Methodology for More:
1. Content
2. Representation
3. Implementation
   - Focus on inclusiveness of methodology itself

Challenges to Integrate User Input into the Design Process

- Diversity of preferences, experiences & (dis)abilities
- Own experience & knowledge

GAP THEORY – PRACTICE

Challenges to Translate Available User Input into an Actual Design Project

Design Process for More: Supports the architect to imply inclusive user input into the design project.

Research Methodology

- Literature Study
- Questionnaire with architects
- Workshop with architects
- Case study in architectural practice
- Interviews stakeholders
- Case studies design processes
- Literature Study

PhD Track
